

SHARAD SAHA

+918100436317 — sharadsaha24@gmail.com — linkedin.com/in/sharad-saha — github.com/ss18562

PROFESSIONAL SUMMARY

Computer Science undergraduate with knowledge of **HTML, CSS, JavaScript, Python, AI/ML, Data Structures, and Database Management Systems**. Experienced in developing a **Web Development Project** involving responsive user interfaces and backend integration, and an **AI/ML Project** focused on predictive modeling and data analysis. Strong analytical, programming, and teamwork skills with a keen interest in software engineering, machine learning, and full-stack development. Seeking opportunities to apply technical expertise and grow in a professional environment.

EDUCATION

B.Tech in Computer Science & Engineering	2023 – 2027
<i>Institution of Technical Research and Engineering</i> CGPA: 7.89 / 10.0	
Class XII — Science Stream	2021 – 2023
<i>Narayana High School</i> Percentage: 75.0%	
Class X	2020 – 2021
<i>Akshara The School</i> Percentage: 85.50%	

TECHNICAL SKILLS

Languages	Python, Java, C, C++
ML & AI	Scikit-learn, Pandas, NumPy, NLP, TF-IDF Vectorization, Logistic Regression, Feature Engineering, Model Evaluation (Precision, Recall, F1)
Web Development	HTML5, CSS3, JavaScript, React.js, MongoDB
Tools	Git, GitHub, VS Code, Chrome DevTools, Streamlit Cloud
CS Concepts	Data Structures & Algorithms, OOP, DBMS, Operating Systems, REST APIs

PROJECTS

Student Performance Prediction System - Machine Learning

- Developed an end-to-end machine learning system to predict student academic performance using attendance records, study hours, assignment scores, and examination data, achieving high classification accuracy through ensemble learning techniques.
- Performed comprehensive data preprocessing, feature engineering, exploratory data analysis, and model optimization using Logistic Regression and Random Forest algorithms to improve predictive performance.
- Built an interactive prediction dashboard enabling real-time performance forecasting and visual analytic, providing actionable insights for students and educators.

Smart Placement Preparation System - Full-Stack Web Development

- Engineered a full-stack placement preparation platform integrating aptitude practice, coding challenges, interview resources, and personalized progress tracking within a unified web application.
- Implemented secure user authentication, database management, and responsive user interfaces while developing RESTful back-end functionalism using Flask and MySQL.
- Designed performance analytics dashboards and automated assessment modules, enhancing user engagement and enabling data-driven preparation strategies for placement readiness.

ACHIEVEMENTS & ACTIVITIES

- Earned certifications in **Machine Learning, Cloud Computing, and Web Development**, strengthening practical and industry-relevant technical skills.
- Developed multiple end-to-end software solutions combining Machine Learning, Data Analytics, and Web Technologies.
- Currently developing an AI-powered Placement Readiness Platform focused on personalized learning and career preparation.
- Built and deployed predictive intelligence systems for educational and information-analysis use cases.
- Active learner in AI, ML and software development communities.
- Collaborated with team members during academic projects to design and implement software solutions.
- Continuously exploring emerging technologies including Gen AI, LLMs and intelligent automation system.
