+91-8100436317 — sharadsaha24@gmail.com — linkedin.com/in/sharad-saha — github.com/durgesh033

PROFESSIONAL SUMMARY

Computer Science undergraduate with knowledge of **HTML, CSS, JavaScript, Python, AI/ML, Data Structures, and Database Management Systems**. Experienced in developing a **Web Development Project** involving responsive user interfaces and backend integration, and an **AI/ML Project** focused on predictive modeling and data analysis. Strong analytical, programming, and teamwork skills with a keen interest in software engineering, machine learning, and full-stack development. Seeking opportunities to apply technical expertise and grow in a professional environment.

EDUCATION

B.Tech in Computer Science & Engineering	2023 – 2027
<i>Institution of Technical Research and Engineering</i> CGPA: 7.89 / 10.0	2021 – 2023
Class XII — Science Stream	
<i>Narayana High School</i> Percentage: 75.0%	2020 – 2021
Class X	
<i>Akshara The Schoo</i> Percentage: 85.50%	

TECHNICAL SKILLS

Languages	Python, Java, C, C++
ML & AI	Scikit-learn, Pandas, NumPy, NLP, TF-IDF Vectorization, Logistic Regression, Feature Engineering, Model Evaluation (Precision, Recall, F1)
Web Development	HTML5, CSS3, JavaScript, React.js, Streamlit
Tools	Git, GitHub, VS Code, Chrome DevTools, Streamlit Cloud
CS Concepts	Data Structures & Algorithms, OOP, DBMS, Operating Systems, REST APIs

PROJECTS

Fake News Detection System - NLP & Machine Learning

- Built an end-to-end NLP text classification pipeline to detect fake vs. real news articles using TF-IDF Vectorization and Logistic Regression, achieving strong accuracy on benchmark datasets.
- Applied robust preprocessing — tokenization, stopwords removal, punctuation filtering — and managed the full ML lifecycle from data ingestion through model training, evaluation, and cloud deployment.
- Deployed an interactive Streamlit web application on Hugging Face Spaces enabling real-time article classification accessible publicly via URL.

Student Performance Prediction System - Machine Learning

- Developed a machine learning model to predict student academic performance based on attendance, study habits, and assessment scores.
- Performed data preprocessing, feature engineering, and model evaluation using Scikit-learn.
- Achieved high prediction accuracy using classification algorithms such as Random Forest and Logistic Regression.

Smart Placement Preparation System - Full-Stack Web Development

- Developed a full-stack web application to assist students in placement preparation through aptitude tests, coding challenges, interview resources, and performance analytics.
- Implemented user authentication, database management, and responsive UI design.
- Enhanced user experience through personalized preparation tracking and progress visualization.

Work Experience

Software Engineering Intern - Bluestock | 2 Months

- Assisted in the development and maintenance of software applications using modern programming and web development technologies.
- Collaborated with the development team to implement new features, debug issues, and improve application performance.
- Participated in software development lifecycle activities including requirement analysis, coding, testing, and deployment.
- Worked with databases, APIs, and version control tools to support application development.

ACHIEVEMENTS & ACTIVITIES

- Interested more in AI/ML applications, Cybersecurity, IoT and modern web technologies.
- Earned certifications in **Machine Learning, Cloud Computing, and Web Development**, strengthening practical and industry-relevant technical skills.
- Experienced in developing AI/ML and full-stack web projects, with strong analytical, problem-solving, and software development skills.
- Participate in technical workshops, webinars, and certification programs related to emerging technologies.
